

Quick Tips for Pregnant Women with a Positive Zika Test

what you can do...

... before your baby is born

Find a pediatrician (a doctor for your baby)

Tell the pediatrician you tested positive for Zika virus

See a maternal fetal medicine specialist (a doctor for complicated or high-risk pregnancies) to do ultrasounds or other tests to check the growth and development of your fetus

... when your baby is born

Ask for your baby to be tested for Zika while still at the hospital

Remind your pediatrician you had Zika while pregnant

Learn what to expect and how to monitor your baby's growth and development
